Maquiberry

IMMUNE BOOSTER PURPLE POWER.

Growing in Chilean Patagonia, Maquiberry is an ancestral treasure packed with properties beneficial to health.

Aristotelia chilensis is a Patagonian bush that thrives in the temperate forests throughout the center and south of Chile.

Its berries are a great source of antioxidants and essential trace elements, which makes them immune boosters.

A high content of anthocyanins makes this super berry more powerful. The deeper the purple, the higher the immune defenses. Maquiberry is 16 times more purple than açai.

KNOW THE PURPLE POWER

Imports of Maquiberry into the US were approved for the first time as on the Official USDA List.

The 2010 edition of “Fruits and Vegetables Import Manual” by the United States Department of Agriculture (USDA) allowed maqui fruit *Aristotelia chilensis* in Sec 3-66 10/2010-I22 PPGQ to be imported from Chile.

506 chosen foods high in flavonoids mentioned Maquiberry content of cyanidins and delphinidins for the first time.

The 2018 edition of USDA Database for the Flavonoid content of Selected foods by Nutrient Data Laboratory Beltsville Human Research Center and Agricultural Research Service US Department of Agriculture, p46, mentions the anthocyanin composition of Maquiberry.

Anthocyanin average intake in the United States is 12.5 mg/day.

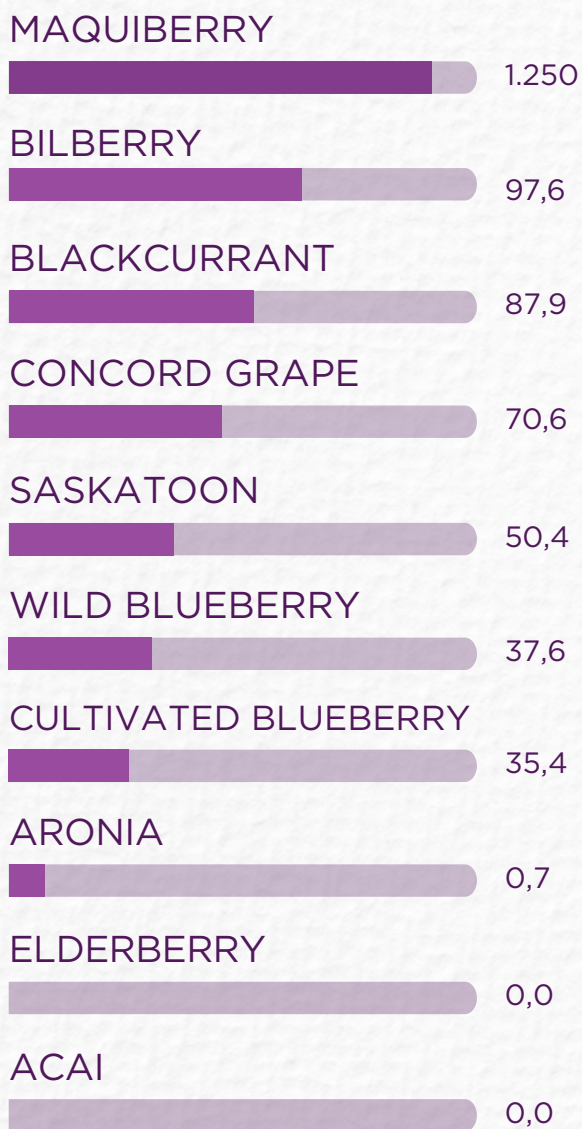

The Journal published in 2015 @ RevEndocrMetab Disorder: “The update of anthocyanins on obesity and type 2 diabetes: Experimental evidence and clinical perspectives”.

Authors: Honghui Guo, Wenhua Ling

However, recent investigations by Wu and Colleagues which take into consideration more than 100 common foods estimate anthocyanin consumption at only about 12.5 mg/day in the United States.

The level of anthocyanin consumption of Mediterranean countries (100-120 mg / day) is suggested. This is possible by supplementing the diet with Maquiberry products.

A POWERFUL IMMUNE BOOSTER

Boosts immune system

High antioxidant content (anthocyanins, delphinidins, quercitins).

Protects from heart disease

Combats inflammation

Regulates sugar in blood

Eye health

Boosts lung function

Weight control

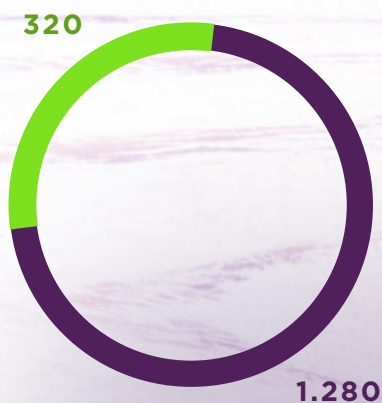

WHAT IS THE RECOMMENDED DAILY INTAKE OF ANTHOCYANINS?

On average, the health of Mediterranean citizens is better than that of American citizens. Why not try to increase average anthocyanin intake from 12.5 to 100 mg as in Mediterranean countries? One way to achieve it: supplementation with MAQUIBERRY products - purple juices and powders.

MAQUIBERRY CONTAINS 8 ANTHOCYANINS

- del 3-O-sambubioside-5-O-glucoside
- del 3-O-glucoside-5-O glucoside
- cya sambubioside-glucoside
- cya glucoside-glucoside
- del 3-O-sambubioside-5-O-glucoside
- del 3-O-glucoside-5-O-glucoside
- cya 3-O sambubioside
- cya 3-O glucoside

- Delphinidins
- Cyanidins

MAQUIBERRY INTRODUCTION INTO US MARKET

1

2010

Maquiberry imports into the United States allowed.

2

2018

The 2018 edition of "USDA Database for the Flavonoids content of Selected foods" included Maquiberry anthocyanins profile.

3

2019

Creation of Maquiberry from Chile promotion committee.

4

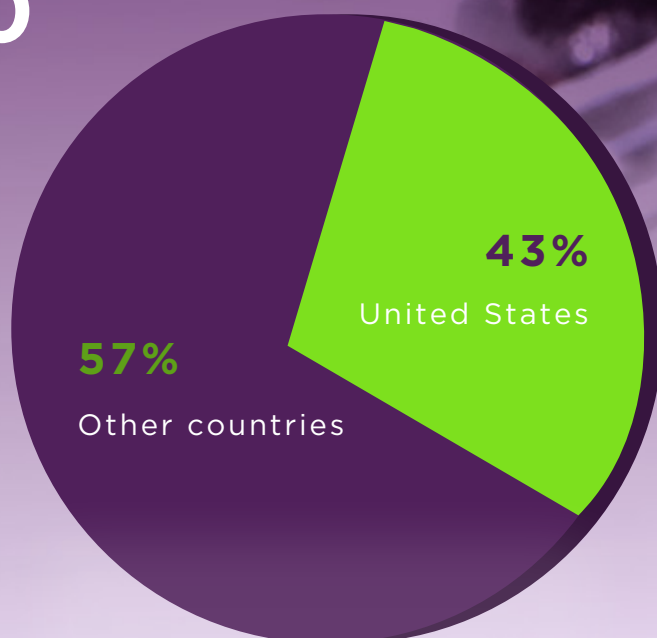

2021

Imports into the United States.

1. Maquiberry freeze-dried powder
2. Maquiberry juice.

LEADING COMPANIES

MEET THE LEADING ORGANIC MAQUIBERRY
PRODUCERS IN CHILEAN PATAGONIA:

Bayas del Sur

Concentrating Nature

On the edges of Chilean Patagonia, Bayas del Sur was born more than 30 years ago. A company that arises seeking to bring to the world part of the purity and magic of this land, where it discovered a great opportunity in the processing of berries, thanks to the favorable climatic, soil and water conditions, which deliver products of exceptional quality, color and aroma.

BAYAS DEL SUR

COMPANY INFORMATION

Bayas del Sur works to satisfy the needs of value-added food products and functional ingredients derived from berries of Chilean Patagonia lands and to be globally recognized as the world's berry fruits specialists.

The best fruits from the south of Chile are processed with Swiss technology, specialized in the extraction of berries, to obtain Juice Concentrate and Freeze-dried fruits with outstanding characteristics for the international market, which allows us to sustain international certifications.

Our 2,500 m plant processes raw material from Maquiberry, Elderberry, Blueberry, Raspberry, Blackberry, Strawberry and Cranberry.

PRODUCT INFORMATION

Patagonol is our line of products oriented to the industrial market, food companies, beverages and nutraceuticals. Our Juice Concentrate and Freeze-Dried Products bring to more than 30 countries in the world the guarantee of color, flavor and anthocyanin content, extracted with the highest standards, quality controls, care for the environment and respect for local communities.

Purple Secret is undoubtedly one of the greatest innovations that Bayas del Sur has developed. Delicious and healthy gummies based on Berries, aimed at all those who choose a healthier and more active lifestyle, along with fibers, proteins, vitamins, minerals and antioxidants, making it the perfect complement for a more natural lifestyle.

Nativ for life

Traditions of thousands of years, discovered in trees and harvested from southern Chile, these fruits have been treasured by the ancestral cultures. Healthy and taste, we believe taste and health should not be mutually exclusive. Rights and action we defend your right to eat well and have a full and healthy life. Kindness and connection we believe a little kindness can bring us together.

NATIV FOR LIFE

COMPANY INFORMATION

Nativ for Life was created by Eng. Claudia Guiloff and Isabel Lacaros in 2010; With the aim to supply health in a natural and innovative way, through native fruits from Patagonia, where each one contains bioactive principles with specific benefits. Fruits Wild collected by local people which work close with us.

We work with Sustainability, Environmental Protection and Traceability Programs. We are the leading player in wild organic harvesting of Maquiberry with 40% of the market, and fair trade with communities. Our products are 100% fruit, they don't have additives.

PRODUCT INFORMATION

We sell in supermarkets and pharmacies in Chile and export to more than 20 countries. We export for wholesale and retail to Australia, Korea, Japan, Taiwan, Singapur, Indonesia, Malaysia, Thailand, France, Germany, Arab Emirates, Poland, Israel, United States of America, Colombia, Ecuador, Costa Rica, Peru, Argentina, Uruguay, Paraguay and Brazil.

The Vilkun logo is presented in white text on a purple rectangular background that has a red triangular corner cutout on the right side. The letters 'i' and 'k' in 'Vilkun' have small colored dots above them: a yellow dot above the 'i' and a blue dot above the 'k'.

Vilkun

The background image shows a vast landscape. In the foreground, there are rows of dormant, reddish-brown berry bushes in a field. In the middle ground, a long, modern industrial building with a red roof and large windows is visible, likely a processing facility. Behind the building, there are green trees and rolling hills. In the far background, a large, rugged mountain with a snow-capped peak rises against a blue sky with scattered white clouds.

Super Berries From Chile. Our passion for more than 15 years is to select and transform the best berries from Latin America through innovative processes. We offer dehydrated, freeze-dried and frozen berries.

VILKUN

COMPANY INFORMATION

In "Vilkun" our people make the company what it is today. From the south of Chile, we combine origin and vanguard with the latest technology that makes us ambassadors of the best South America native berries as well as traditional Berries & Cherries both Organics and Conventionals.

Procesos Naturales Vilkun SA has its origins in 2004, based on entrepreneurship and Innovation, nowadays it is a revolutionary Super-Food Natural Process business Unit, belonging to SAN JOSE FARMS, one of the main Agro-Industrial growing company in LAT-AM.

PRODUCT INFORMATION

Our facility is one of the most advanced in the Southern hemisphere for the production processes of juice infused and dehydrated berries, and recently we developed a new "Quick" freeze-dried process, with state-of-the-art German technology, which allows us to offer superior quality FD products from South America to USA, EUROPE, AUSTRALIA; JAPAN; ASIA.

We work to find modern solutions to agricultural work, always looking for the latest trends to connect and simplify operations. Our developments are "open source" and at the service of all, understanding the collaborative role we must play to be a pillar of development of global agricultural technology.

We are committed to promoting the efficient use and saving of resources and energy. We have strict controls and focus on the minimization of pollutants and emissions of greenhouse gases released into the environment. We comply with the requirements and applicable laws, tight working with Chilealimentos and the Chilean Agency for Sustainability and Climate Change on an APL agreement.
